We've got you covered
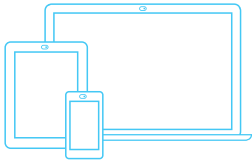

fluence

In three easy steps you could set up the cover

1. Remove the blue tape

2. Open the camcover, align with webcam and press firmly, give it a couple seconds to stick

3. Slide cover to close/open

Or a decentralized database in Fluence

1. Go to the Devnet dashboard at **fluence.one/deploy**

2. Pick "SQL" or "Redis" in the "Instant Deploy" and punch it!

3. That's it! Integrate your app with a decentralized DB with a few lines of code (following the prompts at the dashboard) or learn how to make a fully decentralized application at **fluence.one/docs**
